Possess strong communication skills and a good team player with strong interpersonal skills.

Trained juniors on testing support skills, defect analysis and maintaining test documents.

WORK HISTORY

Vasudhaika Software Solutions, Hyderabad, India
Software Engineer in Test

2011-2014

Projects:

OpenERP finance and warehouse module for a local retail chain:

- Tested various stages that dealt with billing, transactions, warehouse, inventory.
- Worked closely with the finance team to ensure better testing.
- Received appreciation from the customer as the application turned out to be as expected as per the requirements.

.NET based software for the state's agriculture products market committee:

- Created test suites for testing using Selenium WebDriver.
- Reduced the required time during release so that the bugs can be found in a more effective way.
- Introduced Testlink to the team to write and document test scenarios and test cases as required and keeping track of their executions.

Karnataka Silk Sarees Corporation(KSIC):

- Worked to get the complete flow from entering the details regarding the sarees to being able to sell it to the customer which included creating purchase orders, processing the order and confirming the purchases.

Ghana Medical Project:

- Performed functional, UI testing to check the flow of the application from entering the relevant details of medications, their doses and the disease that it has to be administered to. Made sure that the requirements were met.

Achievements:

Received employee of the year award out of 150 employees in November 2012 after working for 11 months as I gave valuable inputs for an application.
